Tanishk

+91 9315991761 | tanishkk501@gmail.com| /imtanishk | /Tanishk-exe | Sonipat, India

Aspiring AI Engineer with hands-on experience building intelligent applications using Machine Learning, Deep Learning, and Large Language Models. Developed AI projects across Computer Vision, NLP, Recommendation Systems, and Retrieval-Augmented Generation (RAG) using Python, TensorFlow, LangChain, and LangGraph. Passionate about building real-world AI systems and contributing to practical AI solutions through continuous learning and community leadership.

Education

Gateway Institute of Engineering & Technology | DCRUST University Sonipat, Haryana
B.Tech in Computer Science – CGPA: 7.12/10 2023 – 2027

Technical Skills

Generative AI & LLMs: LangChain, AI Agents, RAG, Prompt Engineering, LLM Applications, LangSmith, RAGAS
AI / Machine Learning: Python, TensorFlow, Scikit-learn, ANN, CNN, LSTM, Transfer Learning, Computer Vision, NLP, Sentiment Analysis, Text Preprocessing, Word Embeddings, Semantic Search
Data & Programming Fundamentals: SQL, Data Structures & Algorithms, OOP, C, C++, Java
Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, VS Code

Projects

Syllabix - AI Study Companion | LangChain, Gemini API, FAISS, Streamlit
- Built a RAG application to help students learn from uploaded books and notes through context-aware question answering.
- Implemented document chunking, vector embeddings, semantic search, and retrieval using FAISS and Gemini API.
- Enables personalized, hallucination-reduced learning by generating answers grounded in the uploaded study material.

YouTube RAG Chatbot | LangChain, Gemini, Huggingface, Chroma

- Developed a RAG-powered chatbot that allows users to interact with YT videos by asking questions.
- Built an end-to-end pipeline using transcript extraction, embeddings, vector search, and LLM response generation.
- Helps users quickly retrieve key concepts and save time while learning from educational video content

Company Policy RAG & Evaluation | Python, LangChain, OpenAI, Gemini API, FAISS, RAGAS

- Built a RAG assistant to answer employee queries from company policy documents with context-aware responses.
- Implemented semantic retrieval and assessed RAG performance using RAGAS evaluation metrics.

IMDb Sentiment Analysis | Python, NLP, TensorFlow, Scikit-learn

- Developed a sentiment classification model using the IMDb dataset containing 50,000+ movie reviews.
- Applied text preprocessing, tokenization, sequence padding, and word embeddings.
- Classified reviews as positive or negative using deep learning-based NLP techniques.

Next Word Predictor | Python, TensorFlow, LSTM, NLP

- Built an NLP model using LSTM networks to predict the next word in a sentence.
- Implemented text preprocessing, tokenization, sequence padding, and word embeddings.
- Generated context-aware predictions by learning sequential patterns from text data.

Leadership & Achievements

Vice President — Student Council
- Coordinating college-level events and student initiatives, improving participation and engagement
- Collaborating with teams to plan and execute large-scale academic and technical events

Vice President — AI/ML Club
- Launched and organized a structured AI/ML GVAC cohort, conducting weekly classes and hands-on workshops.
- Mentored students in machine learning fundamentals and guided them on practical AI/ML projects.

Technical Activities:
- Organized HackSwitch (6-hour hackathon), managing planning, execution, and participant coordination
- Delivered an AI Tools workshop as speaker, introducing practical AI applications
- Led an AI tools workshop for international (Nepal) delegation
- Conducted a Web Development workshop as Speaker for juniors on HTML, CSS, and JavaScript

Certifications:
- Machine Learning Foundations — Amazon Web Services
- ML Foundations: Calculus/Statistics — LinkedIn Learning
